VELUX Australia

Throughout the construction industry, VELUX is a by-word for quality, a reputation that has been painstakingly built up for more than 35 years in Australia and for over 80 years around the world.

Perfectly designed to withstand the world's harshest climatic conditions, all VELUX products are of the highest quality and will perform superbly for a lifetime of faultless service.

Take a look through this guide and judge for yourself. For range, quality, value, guarantees, delivery and service – VELUX is a world leader.

Guaranteed to last...

10 Year Warranty
on all skylights, roof windows and flashings.

3 Year Warranty
on accessories, including electric controls & blinds.

CODEMARK®
Australia
30089/30090/30091

CodeMark® is a voluntary certification scheme owned by the Commonwealth of Australia that provides legally binding evidence of compliance to the National Construction Code of Australia. One certificate replaces dozens of technical papers.

Surpasses Australian tests for skylights

AS1288
OVERHEAD GLAZING

Laminated inner pane

AS3959
BUSHFIRE*

Attack Level 40

Window Energy Rating Scheme (WERS)

(MAXIMUM 5 ON WERS SUMMER RATING)

VELUX Skylights and Roof Windows are included in the National Energy Rating programme (AccuRate) as well as state run programmes such as Basix & FirstRate.

Building Code compliance

All VELUX Skylights/Roof Windows (except Sun Tunnels) are deemed non-combustible and thereby comply with NCC Boundary Separation requirements i.e. suitable for use within 900mm of a boundary for buildings of Class 1 & 10 (typical residential dwelling)*.

* CSIRO assessment report available on request. VELUX recommends consultation with relevant authority before work commences. Opening models assessed in closed position.

^ Skylight product range only. Custom-made flashing required. Tested in closed position, fire resistant mesh may be required for opening models. Rigid Sun Tunnel BAL29. Please consult your local council.

† Except GPL Roof Window and Sun Tunnel. VCS/VCM cyclone test not performed with screws provided, installation requires the use of #8 roofing screws.

Glazing

High Performance Double Glazing

Standard across entire skylight range

- Laminated inner panes (total 5.36mm) for added safety.
- 3mm outer pane of toughened safety glass.
- Low-E³ coating maximises Light Transmittance/reduces Solar Heat Gain.
- 9mm Argon filled cavity together with Low-E³ coating increases thermal performance by reducing heat flow through the pane.
- NEAT™ Coating on outer pane reduces cleaning frequency.
- Warm edge technology increases energy efficiency.

Benefits:

- Radiant heat block: Complete window **approx 75%**
- UV Harmful rays block **approx 99%**
- Noise reduction factor **32 decibels**
- WERS rating **5 stars**
- Double layer of Low-E³ coating.
- 10 year warranty on insulated glass seal.
- Reduced cleaning frequency.

Australian Standard AS1288

Laminated glass (standard) must be used for skylights installed 3m or more above floor level.

NEAT™ Photocatalytic Coating

- Silicone Dioxide/Titanium Dioxide coating reacts with the sun's UV rays to decompose surface organic dirt before rinsing away with the next shower of rain, thereby reducing cleaning frequency.
- The coating also makes the glass surface smoother, so water disperses evenly, sheets off and evaporates quickly; thereby minimising water spotting on the pane.

GGL/GPL window pane tint (i.e. colouration) is slightly different to skylight window pane tint.

Measure & Quote

VELUX has recommended installers throughout the country that are trained to install VELUX skylights. Scan the QR code below and complete the online webform when you're ready to take the next step, and we'll arrange for a recommended installer in your area to provide a Measure & Quote.

Installers recommended by VELUX are independent contractors who have been trained in the installation of VELUX products but are not employed by VELUX Australia. VELUX cannot be held responsible for work carried out on your property by installers who are independent of VELUX Australia.

Automatic sensor-based ventilation*

Solar-Powered Skylights

- Solar panel mounted below the skylight provides all the power needed to operate the skylight.
- Rain sensor automatically closes skylight when rain is detected.
- Battery power negates power surges and blackouts.
- Easy to install, no need for electrical wiring.

*Requires **VELUX ACTIVE**
- sold separately (Page 5)

Pitched Roofs

VSS

Solar-powered skylight

The VSS is the ultimate skylight that provides abundant daylight and controllable ventilation. Operated by a Radio Frequency wall-mounted keypad (included) and is powered by a concealed battery pack that is recharged by the external solar panel – allowing operation even when the sun isn't out.

- Electrician not required to install.
- White painted interior timber frame and sash.
- Smooth profile sits lower in the roof, does not obstruct the roofline.
- Available in 10 sizes.
- Rain sensor automatically closes the skylight when rain is detected.
- High Performance double glazing, with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Complete with flashing for corrugated iron or tile roofs.

Also available

VSE

Electrically operated

- Choice of 9 sizes.
 - 2 metre lead (supplied) plugs into power point.
 - White painted interior timber frame and sash.
 - Insect screen, rain sensor and wall-mounted keypad included.
- Visit www.velux.com.au for more details.

VELUX ACTIVE indoor climate control (sold separately)

- **Sensor-based ventilation:** Smart sensors continuously monitor temperature, humidity and CO₂ levels and open or close your skylights accordingly.
- **Stay in control:** Use the app to operate your skylights and blinds using your smartphone.
- **VELUX Active** operates on 2.4GHz and is compatible with modern 'smart' modems. (select the 2.4GHz channel in dual mode on your modem).

Solar Blinds

Honeycomb Blackout – FSCH (for VSS/VSE), FSCC (for VCS)

Blockout – DSH (for VSS/VSE)

- All blinds are available in white.
- Sold separately.
- Unique installation system allows easy installation.

* For roofs below 15° pitch, VSS/VSE skylights need to be raised to 15° and custom flashed. VELUX can assist with technical advice and drawings. (NB: build-up not recommended in Bushfire areas.)

** VELUX recommends VCS is installed with a slight pitch (e.g. 3°-5°) to help reduce condensation build-up and water ponding on the glass.

† U-value (W/m²K) and SHGC data based on AFRC simulations, (complete skylight size; VSS/VSE: 1140mm x 1180mm, VCS: 1275mm x 1275mm).

‡ Cyclone test not performed with screws provided, installation requires #8 roofing screws.

± Hailstone test not performed on solar panel. Solar panel not attached during test.

^ Skylight only. Custom-made flashing required. Skylight tested in closed position (VCS BAL assessed – based on VSS results), metal flywire mesh protection required for opening apertures (consult local council). Roof pitch; VSS: 18°-75°, VCS: 0°-60°. †† Assessed in closed position.

Healthy daylight, fresh air and sky views

Imagine the Possibilities

With the new VELUX Visualizer app, we've made it easier than ever to reimagine any room in your home. Using your device's built-in camera, this augmented reality app allows you to add, customize, and explore our skylight products in real time.

^ Custom-made flashing required. Skylight tested in closed position, metal flywire mesh protection required for opening apertures (consult local council). Roof pitch; VS: 18°-75°, VCM: 0°-60°.

NB: NCC Vol 1 & 2 regulations (Prevention of Falls from Windows – Balustrades & Barriers): contact VELUX for information relating to restrictor devices for within-reach opening skylights.

Outstanding daylight provision

where extra ventilation is not required

FCM skylights: Versatile double-glazed alternative to acrylic domes.

Old acrylic domes can be easily damaged.

FCM SKYLIGHTS ARE IDEAL REPLACEMENTS** FOR ACRYLIC DOMES
12 sizes available to replace common acrylic dome sizes.

In simulated tests* VELUX skylights withstood hailstones, up to the size of cricket balls, launched at speeds experienced during heavy storms.

See Hail Storm case study.
www.velux.com.au

** Custom-made collar adaptor (not supplied) required to fit.

*ASTM E822-2009 standard practice for determining resistance of Solar Collector Covers to Hail impact with propelled ice balls.

Pitched Roofs

FS

Fixed (non opening)

Suitable for pitched roofs, the FS Skylight is the perfect solution for creating light filled rooms where added ventilation is not necessary. Energy efficient glazing and the use of blinds ensure heat transference is minimised.

- White painted interior timber frame.
- Outer aluminium cappings (grey).
- Complete with flashing for corrugated iron or tile roofs.
- High Performance double glazing as standard; with NEAT™ outer coating: reduces cleaning frequency.
- Smooth profile sits lower in the roof, does not obstruct the roofline.
- Available in 11 sizes.

Flat Roofs

FCM

Fixed (non opening)

Suitable for flat roofs, the brilliantly simple FCM Skylight is a cost effective way to provide natural daylight to buildings with flat roofs. The High Performance double glazing provides excellent thermal insulation and has been tested for hail resistance.

- Unlike acrylic or polycarbonate – laminated glass will not fade nor discolour over time.
- The smooth exterior gives a lower profile on the roof.
- High Performance double glazing as standard; with NEAT™ outer coating: reduces cleaning frequency.
- Approx 99% UV Block.
- Available in 12 sizes.
- Requires custom-made flashing (not supplied by VELUX).
- Versatile positioning††: most sizes can be used in portrait, landscape or even "diamond shape" orientation.

Blinds for FS

Manual Honeycomb Blackout – FHCD

requires ZXT 200 rod control for out-of-reach.

Solar Honeycomb Blackout – FSCD Solar Blackout – DSD

Includes wireless, wall-mounted keypad.

- All blinds are available in white.
- Sold separately.
- Unique installation system allows easy installation.

Preparation guide for custom-made flashing

Note: If timber hob is greater than 38mm the Gyprock will encroach on the glazing area.

‡Skylight must be installed with timber hob and Gyprock, as shown (typical installation), to achieve 2.9 U-value rating.

* For roofs below 15° pitch, FS needs to be raised to 15° and custom flashed. VELUX can assist with technical advice and drawings. (NB: build-up not recommended in Bushfire areas.)

** VELUX recommends FCM is installed with a slight pitch (e.g. 3°-5°) to help reduce condensation build-up and water ponding on the glass.

† U-value (W/m²K) and SHGC data based on AFRC simulations, (complete skylight size; FS: 1140mm x 1180mm, FCM: 1275mm x 1275mm).

^ Skylight only. Custom-made flashing required. Roof pitch; FS: 18°-75°, FCM: 0°-60°.

†† FCM 2270 not recommended for "landscape" orientation.

For Attic Conversions

for within-reach only

15°-90°
INSTALLATION PITCH*

GGL

Centre-Pivot roof window

Beautifully engineered for a lifetime of use, the GGL is ideal for within-reach attic situations.

- A short pull on the top control bar allows filtered background ventilation even while the window remains shut.
- A second pull on the control bar allows the window to rotate for maximum ventilation – and up to 180° for cleaning the outer pane from inside the room.
- Quality white painted pine sash & frame.
- Complete with flashing for corrugated iron or tile roofs.
- Available in 5 sizes.
- Laminated double glazing as standard.

Blinds for GGL/GPL

Manual Honeycomb Blackout – FHC Manual Blackout – DKL

- All blinds available in white • Unique installation system allows easy installation • Sold separately

Opening Restrictors

NCC Vol 1 & 2 regulations (Prevention of Falls from Windows – Balustrades & Barriers): contact VELUX for information relating to restrictor devices for within-reach opening roof windows.

* For roofs below 15° pitch, roof windows need to be raised to 15° and custom flashed. VELUX can assist with technical advice and drawings.

† U-value (W/m²K) and SHGC calculated according to EN 14351-1:2006 + A2:2016 (window size 1140mm x 1400mm).

‡ Except Cyclonic.

Sun Tunnels

Time-saving design

The VELUX Sun Tunnel has been designed to make installation quick and easy. Tube assembly is simple so little time is spent in the roof cavity.

The VELUX rigid (TWR) and flexible (TWF) Sun Tunnels provide installation flexibility. Rigid tunnels are most suited to roof spaces with minimal obstructions. They have a highly reflective shaft to achieve maximum light output. Flexible tunnels can be used when obstructions in the roof cavity prevent the use of rigid Sun Tunnels.

VELUX Sun Tunnels for pitched roofs are designed to provide natural light into corridors, stairwells, powder rooms and cupboards; where installation of a VELUX Skylight is not possible.

(TWR pictured)

AFTER

BEFORE

CORRIDORS, STAIRWELLS AND POWDER ROOMS

DAYLIGHT WHERE YOU WANT

Product features:

- Choice of highly reflective rigid or flexible tunnel (350mm diameter, lengths vary – details on page 15).
- 4mm toughened external glass.
- Dual-layered ceiling diffuser – spreads light over an area of up to 9m².
- Interior diffuser with 'Edge Glow', a clear ring on the diffuser's edge.
- Outer polyurethane cappings with integrated flashings for tiled/corrugated iron roofs.
- 'Stay clean' coating on glass exterior reduces cleaning frequency.
- Easier and quicker to install with VELUX Flexi Loc system. (TWR).

TWR
Technical Performance
Bushfire [^]
BAL29
Australian Standards
AS4285 (Except cyclonic)
AS3959 [^]

NB: For best performance VELUX recommends TWR for shafts over 1m.

* Sun Tunnels are not suitable for roof pitches below 15°.

[^] Bushfire testing applicable to roof pitches 18°-60°. TWR only.

VELUX Blinds – effective light control

VELUX has a choice of blinds that provide different levels of light control. Tailor-made to fit perfectly to each size of skylight or roof window, they are easy to install and are supplied with white powder-coated side channels that allow the blind to be positioned at any point down the window.

Honeycomb blinds

A stylish and modern blind providing protection from heat and glare while providing a near complete blackout from light.

- Honeycomb structured material.
- Near-total light reduction.
- Reduce heat by approx 70%*.
- Available in white only.
- White rails and body.

Blockout blinds

Provide near complete blackout from light.

- Blind can be stopped at any position on the window.
- Near-total light reduction.
- Reduce heat by approx 40%*.
- Available in white only.
- White rails and body.

Easy to Install

Unique installation system makes installing our blinds a snap!

Installation is simple if window is within easy reach.

[^] Manual Blinds for Fixed Skylights require ZXT 200 rod control for out-of-reach situations (Sold separately).

**Solar blinds include wireless wall-mounted keypad (KLI 312).

Contact VELUX for information on blinds for FCM.

NB: Blinds can be retrofitted to skylight after installation (FCM skylights require additional Accessory tray to be used to fit blinds).

Please note: New VELUX blinds do not fit older VELUX products. Contact VELUX to check availability of suitable blinds.

* Based on VELUX internal testing with 3076 model roof window.

NB: VELUX recommends retracting blinds during windy conditions if skylight is open.

Precision-made Flashings

Safe, effective rainwater drainage

The unique construction of VELUX flashings ensures safe drainage of rainwater coming from the roof above the window. Because the roofing material covers both top and sides, VELUX flashings are largely unobtrusive. To harmonise even further with the roofing material, they are available in standard grey aluminium.

EDW flashing – for metal or tile roofing. e.g. corrugate, tile

- Flashing for single skylight or roof window.
- Designed for roof pitches from 15° to 90°. For roofs below 15° create pitch-up and use custom made flashing (not supplied by VELUX).

VELUX Combination Flashing

for metal or tile roofing. e.g. corrugate, tile

Side by Side

Above – Below

Multi (4+)

VELUX skylights can be coupled together using 'combi' flashing in a variety of configurations to add truly inspiring features to any room of the house.

When installing skylights with 'combi' flashing, skylights must be installed with a strict 100mm space between each skylight. See back page for information on 'combi' flashing product codes.

Contact VELUX when installing VSS above/below combination due to positioning of solar-panel.

NB: New VELUX flashings do not fit older VELUX products. Contact VELUX for information and pricing. RRP does not include combination flashing, contact VELUX for information regarding price of combination flashing.

Custom flashing – All other situations

- Required for flat roof skylight installations.
- Useful for situations where VELUX flashing isn't suitable. Such as bushfire areas, or when installing in a roof outside the installation pitch range (pitch adaptor), or when colour matching to roof is preferable.
- Not supplied by VELUX, contact VELUX for more information on custom flashing.
